What you should know about skilled crafts?

The skilled crafts sector with its predominantly small and medium-sized enterprises forms the core of the German economy. As employers, training companies and as economic engine the skilled crafts contribute significantly to ensure the prosperity and development of society.

Craft occupations not only enjoy a high reputation in Germany. The quality of training and continuing education in this sector is also known worldwide.

The German skilled crafts in numbers:

- more than 1 million enterprises
- more than 5 million employees
- more than 360 000 trainees

Good reasons for training in the skilled crafts

The skilled crafts sector with its diverse education possibilities and work opportunities offers numerous chances for professional perspectives:

- Training opportunities in more than 130 different professions
- Increasing demand on skilled workers
- Job security and good career prospects
- Less theory and more learning by doing in comparison to university education

From day one you get paid and the wage increases with each year of training.

If you have good practical skills and are looking for a successful career in Germany, the skilled crafts sector could be a very good choice.

What do you have to know about the dual occupational training-system in Germany?

The training (between 2 – 3,5 years) combines practical work and learning in the companies with theoretical education in a vocational school.
